

Sonesse®

Put window coverings in motion... quietly!

Conference rooms

Hotel trade

Food service industry

Entrance halls, showrooms

Sonesse®: wherever serenity is a must

With Sonesse®, interior window coverings and projection screens will meet the expectations of the most demanding users:

- Near silent operation
- Precise alignment for aesthetic appeal
- Reliability guaranteed by the home motion leader

Sonesse® is the recipient of the WCMA Most Innovative Overall Design Award

Appearance

With its white and thin head, Sonesse® 30 will blend discreetly with the most sophisticated interior window coverings or projection screens. Electronic speed control ensures shades will align with each other.

Free to choose your technology

Sonesse® is available with different technologies to meet the requirements of all types of building structures (residential or offices, new or renovation) and for all user needs.

WT Wired Technology

Wired Technology, (Somfy standard wired control).

An ideal solution for new buildings.

Can upgrade at any time to Radio Technology Somfy®.

RTS Radio Technology Somfy®

With over 3 million installations throughout the world, RTS has become the standard for secure radio technology in the building industry. Radio Technology Somfy® means that installations can evolve as new controls are added.

IR infrared

Solutions available, compatible with universal remote control units (home theatre, etc).

Somfy Digital Technology: ILT

Opening the world of digital network for home automation and building management.

Quiet Operation

Sonesse® guarantees a very low noise level, so window coverings will meet the demands of the most discerning user.

Easy to integrate

The Sonesse® range is compatible with existing brackets, crown and drives used with current Somfy tubular motors.

What's more, Somfy also provides a complete system of accessories designed to make the equipment easy to fit and to ensure it will run silently.

Free to choose your functions

To control a single window covering

Situo RTS
room control

To control multiple window coverings

Telis 4 RTS
remote control units
4+1 channels

EXCLUSIVE TO SOMFY

To create and control groups of equipment in different zones of the house

Telis Compositio RTS

EXCLUSIVE TO SOMFY

To create scenarios and play them again in manual or automatic mode. Ideal for managing daylight and obtaining the atmosphere you want...

when you want it.

Chronis Impresario RTS

Sonesse®

Your ultra-quiet offer is one that people are going to hear about!

Your choice for silent success. With its new range of ultra-quiet drive units, Somfy now offers the most advanced line of tubular motors and electronic controls for the interior window covering and projection screen markets.

Sonesse® motor technology provides aesthetic appeal, ultra-quiet precision and motorisation solutions for a variety of window covering applications.

Residential

Home Theatre
